

## Connect Personal Devices to the School's Wi-Fi

1. Select the wi-fi network **Guest**.  
*This is usually found under the Settings areas of your device.*
2. Verify you have a connection by noting the wi-fi bars. 
3. The next time you open your device's Internet browser, a log in screen will appear. Enter your school username and password. For Server, select the option **MA**
4. After successfully logging in, a message will appear telling you to keep that window open. You can either re-open a new browser window or you can click the **Continue** button and a new tab will appear for you to use.

**Internet Access Window**

Please Login.
